Exposure to the sun is a risk factor for the development of skin cancer. The American Cancer Society estimates that about 1 million new cases of skin cancer will be diagnosed in the United States each year. The risk of developing skin cancer is highest for people with fair skin, freckles, and a history of sunburns. People with darker skin have a lower risk of developing skin cancer, but they can still get it. The risk of developing skin cancer also increases with age. People who work outdoors or who spend a lot of time in the sun should take steps to protect their skin, such as wearing protective clothing, using sunscreen, and avoiding the sun during the middle of the day.

8. English Literature

- 1) It holds because of strong law of large numbers (LLN) and central limit theorem (CLT) for iid random variables. For iid random variables, the LLN states that the sample mean converges to the true mean as the sample size goes to infinity. The CLT states that the sample mean, when properly normalized, converges to a normal distribution as the sample size goes to infinity.
- 2) The CLT states that the sample mean, when properly normalized, converges to a normal distribution as the sample size goes to infinity. This is a consequence of the central limit theorem.
- 3) The CLT states that the sample mean, when properly normalized, converges to a normal distribution as the sample size goes to infinity. This is a consequence of the central limit theorem.
- 4) The CLT states that the sample mean, when properly normalized, converges to a normal distribution as the sample size goes to infinity. This is a consequence of the central limit theorem.
- 5) The CLT states that the sample mean, when properly normalized, converges to a normal distribution as the sample size goes to infinity. This is a consequence of the central limit theorem.

4. 2000 was a great year for us as the company went from a net loss of \$200,000 to a net profit of \$1,000,000. We were able to achieve this by increasing our sales and reducing our expenses. We were able to do this by increasing our sales by 20% and reducing our expenses by 10%.

It was designed by architect Richard Rogers.
